

Land at Keresley

Streets

Attractive Streets & Parkland Spaces

Streets within the proposed development are designed to provide good access whilst also creating an attractive environment. Planting will be incorporated into the streets, particularly the more formal Avenues and Link Road, helping to soften these streets and give them a greener character. A network of pedestrian routes and cycleways permeate the proposed development and connect to the wider area. A bus route is also proposed. The design maximises the retention of existing trees and hedgerows throughout the site.

- Key
- Keresley SUE Link Road
 - Avenue
 - Internal Road
 - Mews / Shared Surface
 - Edge Lane
 - Pedestrian / Cycle Link
